Confidentiality Statement

We won’t usually share what you tell us with anyone else without your permission. But if there was an extreme situation, like if you shared that you or someone else was at risk of being seriously hurt, then we would need to break confidentiality and tell other supportive people to keep you safe. (That could be parents, carers or professionals like GP’s or school staff).

If this happened we would discuss it with you first and do our best to make sure you were involved in any decisions that have to be made. We know that you might not want us to share anything, but it is important for you to be safe. If we had safeguarding concerns about anything that you share with us, then we would let you know and guide you through our safeguarding process. If you have any questions about this, then please ask a member of the Winston’s Wish team.
